BUILDING AI THAT WORKS IN THE REAL WORLD | PROVEN BY A GLOBAL APPLE AWARD

Incoming Apple Developer Academy student, focused on integrating artificial intelligence, robotics, and intelligent systems to develop scalable real-world technologies. Passionate about advancing smart infrastructure, digital innovation, and technology solutions that empower communities and industries.

Recognized as an Apple Swift Student Challenge Winner, with proven experience transforming research ideas into applied engineering solutions through human-centered design and interdisciplinary innovation.

GLOBAL ACHIEVEMENTS

Winner Swift Student Challenge 2025

Apple Inc.

Selected among thousands of global applicants from 100+ countries. Designed and developed an innovative Swift application combining advanced programming, human-centered design, and real-world problem solving.

LEADERSHIP AND COMMUNITY

Techniqto

2025

Founder & Chief of Community

- Built learning community focused on programming, robotics, and innovation (80+ members)

Swift Student Cafe - iHub Binus University

2026

Tech Mentor

- Facilitate interactive learning sessions and provide technical assistance to developers.

Swift@America: Road to Swift Student Challenge

2025

Tech Speaker

- Dive into Swift Playground, master animations, and build a personal chatbot

Student Council

2023 - 2024

Chief of Tech Division

- Led digital infrastructure supporting 100+ students and school programs

EDUCATION

SMAN 47 Jakarta

Jakarta

Science and Social Studies

2025 - 2026

- Academic Average: 85+
- Founded a tech community, 80+ registered members

Senior Secondary Khalifa IMS

South Tangerang

Science and Technology

2023 - 2025

- Took 10 national curriculum subjects & 6 Cambridge subjects
- Wrote a research on neural networks as part of the school's research program

SELECTED PROJECTS

AI Emergency Navigation System (SIAGA)

- Built AI-based ambulance routing system using Reinforcement Learning and IoT traffic simulation.
- Generated optimal emergency routes using real-time decision modeling.
- Reduced simulated response time by ~25% and improved routing efficiency.

EXPERIENCE

PT. Teknologi Kecerdasan Sinergi

2024 - present

Founder & Chief Marketing Officer

- Supported deployment and adoption of AI & data analytics solutions.
- Collaborated with technical teams translating AI concepts into real-world applications.

PELNI (Indonesian National Shipping)

2022

Front-end Developer

- Developed interface for the national shipping system, boosting operational efficiency
- Optimizing user experience (UX) to streamline workflows and user engagement.

Lenna.ai

2020 - 2021

Graphic Designer (Internship)

- Develop and designed visual assets for user engagement

TECHNICAL SKILLS

AI & Machine Learning: Reinforcement Learning, Computer Vision, Neural Networks

Programming: Python, Swift, JavaScript

System Development: React, Node.js, Flutter

AI Tools & Data: OpenCV, YOLO, Pandas, SQL, R

CERTIFICATIONS & CONTINUOUS LEARNING

Machine Learning: Modern Computer Vision and Generative AI

2023

Engineered image classification, object detection, and Stable Diffusion workflows using KerasCV with TensorFlow, PyTorch, and JAX backends

PyTorch and Tensorflow 2: Deep Learning and Artificial Intelligence

2023

Mastered CNN, RNN, GAN, and Deep RL architectures applied to Computer Vision, NLP, and Recommender Systems
